

THE ZERO TRUST ALLIANCE

Powering Secure, Mission-Ready Modernization

The US Department of Defense (DoD) faces a rapidly evolving threat landscape—driven by cloud adoption, AI integration, network complexity, and decades of technical debt.

Together, RavenTek and Zscaler provide a clear path forward. By combining RavenTek's mission-focused engineering, integration, and managed services expertise with Zscaler's FedRAMP JAB Moderate and High and IL5 PA cloud-native platform, this partnership helps DoD agencies eliminate attack surfaces, secure cloud-first initiatives, and deliver at the speed of the mission.

Why RavenTek + Zscaler

RavenTek delivers cyber and digital transformation solutions with one mission in mind: empowering those who serve. With deep expertise across defense and national security, RavenTek accelerates modernization with agile engineering, full-spectrum integration, and operational support.

Zscaler is the recognized leader in zero trust architecture, enabling secure access to apps and data from anywhere. Trusted by the DoD and across the federal government, Zscaler's cloud-native platform is built for high-assurance environments—enforcing identity-based access, eliminating lateral movement, and protecting sensitive missions from advanced threats.

Break Down Data Silos

Aggregate security, infrastructure, operations and network data into a centralized platform.

Leverage AI/ML Analytics

Predict bottlenecks, security risks and downtime before they impact operations.

Embrace a Zero Trust Architecture

Continuously monitor and verified data access to ensure that your data is always secure.

Maximize Existing Investments

Optimize current IT tools by connecting capabilities with advanced observability.

Delivering What the DoD Needs—Together

Mission-Aligned Modernization

RavenTek brings deep defense expertise to every engagement, modernizing infrastructure with full awareness of mission objectives, compliance mandates, and operational urgency.

Cloud-Native Zero Trust Architecture

Zscaler's IL5-authorized platform securely connects users to applications based on identity, context, and risk—not network location—enabling secure access anywhere the mission demands.

Seamless Implementation & Support

RavenTek accelerates zero trust deployment with design, integration, and 24/7 support powered by RavenVISION. Our seamless approach ensures operational continuity and long-term resilience.

Secure Access Anywhere

Zscaler enforces least-privileged access with inline threat inspection and dynamic policy controls—protecting users and data across hybrid, cloud, and remote environments.

End-to-End Visibility and Control

RavenVISION provides real-time visibility across users, endpoints, apps, and networks with integrated threat intelligence and performance insights that empower decisive action.

Compliance and Accreditation

RavenTek and Zscaler simplify adherence to DoD mandates like Zero Trust Strategy pillars, CMMC, and RMF by delivering pre-authorized architectures and audit-ready visibility that reduce time to ATO.

RavenTek and Zscaler are redefining how the Department of Defense secures its people, data, and missions. This alliance enables secure modernization—backed by IL5-authorized cloud services, mission-aligned engineering, and always-on support. Whether supporting warfighters at the tactical edge or securing global hybrid environments, RavenTek and Zscaler deliver what the mission demands: security without compromise.
